

PERMITTING PLAN

A comprehensive permitting strategy has been prepared to support project implementation. The proposed project is anticipated to require discretionary permit approval from the Maui Planning Commission (MPC) and various administrative approvals from State of Hawai'i and County of Maui agencies. We will work with State and County agencies to proactively address issues, comply with applicable regulatory requirements, and process permit applications. In addition, community engagement efforts will be initiated from the outset and foster public input aligned with the permitting processes.

The State land use classification for the Kama'ole Solar Project site is "Agricultural."

Based on the property's Land Study Bureau (LSB) classification, the proposed project is a permissible use in the State "Agricultural" district. A change in the State land use classification via a District Boundary Amendment is not required for the Kama'ole Solar Project.

The County zoning for the project site is "Agricultural." A County Special Use Permit (CUP) is required for solar projects on "Agricultural" zoning districts which is obtained through an approval process of the Maui Planning Commission. A change in the County zoning district is not required for the Kama'ole Solar Project. A summary of the permits is provided as follows.

	Permit	Approving Body	Anticipated Timeframe	Permit Type
S T A T E	Chapter 6E, Hawaii Revised Statutes (HRS)	State Historic Preservation Division (SHPD)	12 months	Administrative
	National Pollutant Discharge Elimination System (NPDES)	State Department of Health	< 6 months	Administrative
C O U N T Y	County Special Use Permit (CUP)	Maui Planning Commission	10 months	Discretionary
	Building Permit	Department of Public Works (DPW) Development Services Administration	9 to 12 months	Administrative
	Grading Permit	DPW DSA	< 60 days	Administrative
	Electrical Permit	DPW DSA	< 60 days	Administrative
